

Julia General registry: packages released in the last 12 months

Non-JLL packages; a package counts when a version entry was added in the previous 365 days.

Source: JuliaRegistries/General. The first point is 2018-09-01, the first month with a full 12-month window.

The last point is 2026-10-01, so its window ends before the registry head.
